PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is very good paper. Applied model is appropriate for this study.	
Minor REVISION comments	(From this table, the skewness is -0.17 (negative skewed), is not zero, indicate that log return is asymmetric, and kurtosis is 1.09, is smaller than three which means that the distribution of log returns is flat (platykurtic) relative to the normal) As per this observation, the asymmetric situation is prominent, so the authors are requested to specify the particular periodic span over this considered data set. Because the result is follows as time series data and this Time series is stationary.	
Optional/General comments	In further studies, other such components related to the MONTHLY AVERAGE WHOLESALE PRICE VOLATILITY OF ONION must be analyzed for better result. Because the price of such goods are depends on demand, supply and also on marketing policies.
