### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalejnfs.com/index.php/EJNFS/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Methods need to rewrite The results section; needs to give the significant levels in the figure. Can give either the Table or Figure no need of both The authors should clearly state how they have undertaken the research in methods. The methods part and results are poorly written Results should be discussed based on the statistical analysis. And compare the findings with other relevant works to support the findings.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	In the abstract, it says 6 panelists were for thigh and 6 were for breast muscle. Why not all 12 for both (thigh and breast) samples? Can you combine both results and come to a conclusion?	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
