### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</b>
<b>Compulsory</b> REVISION comments	<p>When describing the experiment, the authors did not indicate the depth of soil sampling for research.</p> <p>In science, there is no concept of room temperature, there should be clear parameters.</p> <p>One of the methods for assessing the use of waste in agricultural production is an environmental assessment. Unfortunately, the authors did not conduct a study on the presence of beneficial and harmful microorganisms.</p> <p>The statistical analysis of the experimental data showed that the increase in the indicator is not reliable because it is within the experimental error. The authors of the article did not indicate this fact, but only made a description of the data obtained. Thus, some conclusions cannot be recommended and characterized as the best.</p> <p>Of the 25 literature sources presented, 10 were published before 2000. It is necessary to increase the number of sources, as well as bring the latest research papers.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
