Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscript submitted to this journal entitled " Environmental and health risks related to the activities of SONICHAR, coal mine in Tchirozérine (Niger) " is an interesting topic for publication in the journal. But the authors need to make some minor revisions, which is given below:</p> <p>1-The topic of the manuscript is interesting and important for the scientific community.</p> <p>2-It is suggested that the title of this study be changed as follows: Environmental and Human Risk Assessment of the SONICHAR coal mine: Agadez Region, Niger</p> <p>3- The abstract part is long and the contents are not arranged and the conclusion is not clearly reported.</p> <p>4- The subsections and structure of the manuscript need to be revised and the format of a scientific article is not considered.</p> <p>5- I think the investigation of this issue in this study is designed and written based on a scientific and logical method. But the topic of this research need more reasoning and discussion, and it should be determined how many the researchers' hypotheses can be accepted and how much they can be rejected.</p> <p>6- In the manuscript, it is better to use newer references, and the style of the references should be based on the reference style of this journal, and the Endnote Software should be used for it.</p> <p>7- In the field of pollution caused by mining activities that may pollute air, soil and water, the identification and measurement of heavy metals is very important. Why toxic heavy metals and metalloid such as mercury, cadmium, lead and arsenic have not been investigated in this study?</p> <p>This work has novelty and by revising the manuscript using comments mentioned above, this manuscript can be published in the journal.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>8-The grammar and structure of the manuscript language needs to be improved.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
