<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	The results of the study are very interesting, and it will make it possible to better optimize the use of nutrients according to the quantities of water available. However, some additional data is missing to add, and I have already translated them into comments on the manuscript. I would also have liked the author to have been able to refer briefly to the problem of aflatoxin in groundnut cultivation in the introduction, as it is not compatible with all consumers.	
<b>Optional/General</b> comments	Tables 1,2,3 and 4 at the level of results and discussions can be found in the appendices.
