

Editor's Comment:

Accepted after the minor revisions

Minor revisions recommended:

- many of the References are not cited in text. The authors should cite references 1, 4, 5, 7, 8, and 11
- the authors should specify the clinic where the described intervention took place
- the ethical aspects should be addressed (as recommended by one of the reviewers, too): informed consent obtained from the patient, ethical approval provided by the institutional committee etc.
- the titles of the figures must explain more clearly what they represent. For example: Figure 1 – Pre-operative aspect of tooth 2.1
- Figure 2 – the authors should specify what IOPA means, or avoid abbreviations
- the commercial product containing 35% hydrogen peroxide should be mentioned
- Figures 10 and 11 do not seem to be correctly placed on the page
- the References style should follow the recommendations of the Journal.
