PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Observing 54 common faunal species in a forest is not believable. It should be more. There are many specific methodology are there which need to be followed for plant diversity study. It seems the authors have only counted the number of plants which is not correct. Calculate the diversity index like Shannon's index etc Reference section is too small	
Minor REVISION comments	Add relevant diversity study references such as Mohanty PK, Paital B. 2005. Behaviour of Langurs and their Interaction with Human Beings at Khandagiri and Udayagiri Hills of Bhubaneswar, Orissa. Zoo's Print , 20(4), 6-10. doi.org/10.11609/zp.v20i4.2833. https://zoosprint.zooreach.org/index.php/zp/article/view/2833	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
