

Review Form 1.6

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_94771
Title of the Manuscript:	Assessment of serum level of Chitinase-3-like protein-1 (YKL-40) in Systemic Lupus Erythematosus patients and its relation to disease activity.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The text is clear and coherent. And the design of this paper is reasonable. The point is worth further study. There is a big problem. The sample size included in this article is too small, so I have doubts about its statistical efficacy and serious doubts about its results. If the author can carry out a complete statistical performance power analysis, it is worth considering again. It is highly recommended that the author should ask professional statisticians to organize the language and methods of their manuscript .	
Minor REVISION comments	I recommend that the authors should organize their language more carefully and make their writing more professional.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
