PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is a very useful information on using proBNP as a marker for cardiac dysfunction in LSDs especially MPS and sphingolipid disorders. For MPS group authors have given explanation of GAG infiltration in cardiac tissues. But for sphingolipid disorders like Gaucher, NPD and Farber disease author need to give explanation of cardiac tissue abnormality. proBNP is used in most of the patients post ERT, can authors demonstrate the pre and post ERT difference in proBNP, that can be one more addition to the effect of ERT on cardiac tissues one can monitor.	
Minor REVISION comments	At some places grammar correction need to be made	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
