

Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_94825
Title of the Manuscript:	THEORY OF ATOM FORMATION
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalpsij.com/index.php/PSIJ/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	First and foremost, it is a given in atomic physics that neutral particles are not affected by the electromagnetic field, so the research hypothesis contradicts the previous studies. In addition to what I mentioned, I would like to point out the following: 1. Some sentences need to be reformulated according to the rules of the English language. 2. There are some spelling errors. 3. There is no need to mention all this number of keywords. 4. Conclusion (very brief) is not sufficient. 5. References do not follow a specific pattern, and do not follow the rules of the journal in writing references. 6. There is no need to write hydrogen (hydrogen – 1,¹H), enough to write hydrogen (¹H) and so on.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
