### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	It is as it presents the opinion of farmers on the overexploitation of groundwater.  Yes, it is.  Yes, it is. Yes, they are.  It is impossible to fully assess it as there is no mention how the random selection process was conducted.  Yes, they are.	
<b>Minor</b> REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	There are some grammar mistakes and the paper should be carefully proofread.	
<b>Optional/General</b> comments	The paper presents very basic statistics. To make it more impactful and interesting for scientific community and other stakeholders it should verify how perception of overuse of water is correlated with water use, types of crops, farm size and age.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
