

Editor's Comment:

In "Influence Diagnostic in Log-Exponential-Inverse- Exponential {Weibull} Regression Failure Model" an exponential-inverse-exponential {Weibull} regression failure model is introduced and studied, from the point of view of calculating its parameters and examining its properties.

The motivation for the genesis of the model is justified and the illustration of its performance successfully executed in an application with real data.

Carefully written, pleasant to read, it deserves publication in AJPAS.
