The topic of this manuscript is of very high importance to oral surgeons.</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language is of very good quality. My comments are:</p> <p>1. The authors wrote the following: "Head and neck cancer (HNC), the sixth most common cancer type, has a 5-year survival rate of just above 50% with modern anticancer therapies" and cite for this 3 old references. More recent references must be used for such a citation.</p> <p>2. This is a very important and well-written review. The authors must give the readers an idea of how they conducted their research (platform from which they got the references, timing, etc.).</p>	
<p>Optional/General comments</p>
