<p><b>Optional/General</b> comments</p>	<p>Dear Editor:</p> <p>The manuscript focused on the Study on the "Scheimpflug imaging of late-onset capsular bag distention syndrome treated with Nd:YAG laser: A Case Report". For several reasons listed below, the manuscript must be revised in order to be published in Journal of Energy Research and Reviews. A major revision may be necessary before acceptance for publication.</p> <p>[1] The new related references are needed to add in the revised manuscript.</p> <p>[2] The abstract must be rewritten and important results must be included</p> <p>[3] The discussion on the results need to be discussed, results and figures chosen to provide a nice story to the paper. It is very hard to follow the motivation/discussion of the paper. In my opinion the introduction needs to be extended with a bit more up to date literature on the topic and the motivation explained.</p> <p>[4] The most important thing is a detailed explanation of the chart rather than a short description of the phenomenon.</p> <p>[5] What are the important applications in this study? Please add in the revised manuscript. [6] The conclusion part should be written more concisely and systematically.</p>
