

Review Form 1.7

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_95898
Title of the Manuscript:	Solitons of the Jimbo- Miwa equation through the sine-Gordon expansion scheme
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamcs.com/index.php/JAMCS/editorial-policy>)

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Jimbo-Miwa equation is discussed by using the sine-Gordon expansion method, in order to analyze the Characteristic of solution, soliton solution pictures are drawn. The JM equation is a important equation and has been studied a lot.</p> <p>Solitons of the Jimbo- Miwa equation and the sine-Gordon expansion scheme</p> <p>Yes, it is.</p> <p>Yes ,they are.</p> <p>I think that the manuscript is scientifically correct, but some details need proof.</p> <p>Yes, they are.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes it is. But the whole language needs to be examined. For example, Equation (2.1), Eq (2.3) are inconsistency. Equation (2.3) can be restored as bellow. (below). Eq (3.3) need check. (V^2/r). $N=2$ in P3 should be pointed above. Fig-1(a,b,c) need check and give some explanations about difference for different k. In the P3 "To investigate the solitons through the MSE method to Eq. (3.1)" MSE means?</p>	
<p>Optional/General comments</p>	<p>Jimbo-Miwa equation is discussed by using the sine-Gordon expansion method, in order to analyze the Characteristic of solution, soliton solution pictures are drawn. The JM equation is a important equation and has been studied a lot. In general, it is a useful paper.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
