

**Editor's Comment:**

Regarding the work JERR 95811 “Designing, Simulating, Implementing, and Testing a Solar Power and an IoT-Based Pisciculture Management System” (latest version: Design and Implementation of Solar Power and an IoT-Based Pisciculture Management System), I have received the first version, the comments of the referees, and the new version. I see that the authors have satisfactorily addressed the referees' remarks, and that they have made the corresponding corrections.

Therefore, I think that the article can be published in its latest version.
