<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Manuscript appears lengthy. It should be concised</p> <p>2. If the study parameters included studying the influence of the desensitising agents on the shades, it could be included in the title as well.</p> <p>3. The title of the study says, Evaluation of the ozonated sunflower oil application on reducing sensitivity after at-home bleaching, it gives a false notion that the ozonated oil is applied after the bleaching. The title should be better restated</p> <p>4. In the methodology, for the study group , the desensitising agent contained both Potassium Nitrate and Sodium Flouride , whereas for the control group, only Potassium nitrate was used. It can be a confounding factor</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Grammatical errors to be corrected
