

Editor's Comment:

Regarding the paper sent:

1. The Abstract to be a narrative presentation, not by paragraphs: the scope of the paper, methodology, results of the study and conclusions.

It requires a subchapter of Findings and Discussion the results and then Conclusions part of what to do further in this respect.

2. The References are wrong written: the authors have to be in alphabetical order of their last names, immediately after, the year of publishing. The first one is Abante A. and the last one is, I think Wuthisatian..

3. The text to be written TNR 12 at 1.5 lines.

Ok then for publishing.
