<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1- Abstract lake from aims and Conclusion.</p> <p>2- No way to make bullets points in the main text body of the introduction or any other sections (just numerical bullet when necessary).</p> <p>3- Diabetes type 1 and 2 should written like this: diabetes type I and II.</p> <p>4- No reference cited for the paragraph: <u>Type 2 diabetes mellitus is the most common type of diabetes and usually occurs after the age of 45 years. The exact cause of this is unknown, but factors such as genetic, obesity, metabolic syndrome, or sedentary lifestyle play a role. As the pancreas secretes more insulin to try to get glucose into the cells, they eventually burn out, and glucose starts building up in the blood. Treatment with insulin is necessary for the later stages of type 2 diabetes.</u> In the introduction section.</p> <p>5- I prefer to publish the manuscript as a mini review article.</p> <p>6- References list should be written according to journal citation style.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Very poor language	
<p>Optional/General comments</p>
