

Editor's Comment:

I have reviewed the files that have been sent to me about the Work JERR 102341, with the original title "Modeling and simulation of pure electric passenger vehicle control strategy", and with the title in the second version "Modeling and simulation of pure electric passenger vehicle based on Matlab and AVL CRUISE". I have seen that the authors have satisfactorily made the corrections requested by the referees.

Therefore, I believe that the article can be published in its second version.
