

Editor's Comment:

I have read the reviewer's comments about the manuscript 2023/IJTDH/98705, and the improvements included by the authors.

Manuscript Title: A Short Review of Coronary Artery Lesions in Children

According to the reviewer's criticisms, the manuscript is potentially suitable for publication in International Journal of TROPICAL DISEASE & Health after additional adjustments described below.

Some inconsistencies still need to be corrected. Authors should remove any mention of systematic literature review, as this is not a systematic review. The introduction has insufficient background and is based on only 1 citation. A more adequate contextualization should be presented, demonstrating the relevance of this study. Clear objectives must be reported in the abstract and at the end of the introduction. The punctuation, language, and format of all references must be corrected and standardized.
