<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Burkitt and not Burkit</p> <p>Diffusion-weighted images evaluate the apparent diffusion coefficient (ADC) which is inversely proportional to cell density, presumably resulting from the tortuosity of the interstitial space and consequential limitation of water movement. Although not always observable, lymphoma tends to present a low ADC value at diffusion-weighted MRI because of its high cellularity, characteristically presenting restriction in those lesions.</p> <p>INCLUDE: Reis F, Schwingel R, Nascimento FBP. Central nervous system lymphoma: iconographic essay. Radiol Bras 2013; 46(2):110–116. Detail more the histopathological findings? CD+?? Was the patient tested for HIV?</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 		
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
