

Editor's Comment:

I have read the text of the manuscript, the reviewers' reports, and a revised version of the text of the manuscript.

I consider the topic of the manuscript relevant. The research results have scientific and applied value.

At the same time, I had some comments about the text of the manuscript, namely:

1. The type of this document should be specified as a Short Research Article.
2. The first sentence of the annotation should be deleted. It is about the following sentence: The present study 'AN ECONOMIC ANALYSIS OF PRODUCTION AND MARKETING OF PEARL MILLET IN JAIPUR DISTRICT OF RAJASTHAN'. At the same time, instead of this sentence, you need to indicate the purpose of the research. It can be formulated roughly as follows: "The purpose of this study is to conduct an economic analysis of pearl millet (*Pennisetum glaucum*) in Injaipur District, Rajasthan."
3. The purpose of the research should also be stated at the end of the Introduction.
4. References to the sources listed at the end of the manuscript should be given in the text.
5. It is necessary to check whether all abbreviations are decoded after the first mention (in particular, in the abstract).
6. All tables should be referenced in the text.
7. I recommend separating the small table that is located before table 1 as a separate table with a number and a name.
8. The text of the manuscript does not fully meet the requirements for its design. Authors should check the correctness of the design of their manuscript. Particular attention should be paid to the correct design of the names of sections and subsections. There are also missing spaces in some places of the text. Perhaps the authors should review articles that have already been published in this journal. Authors will then have a template for adjusting the design of their manuscript.
9. I recommend the authors to carefully check the text of the manuscript for possible typos.

Thus, I believe that after taking into account the listed remarks, the document on the topic "AN ECONOMIC ANALYSIS OF MARKETING OF PEARL MILLET (*PENNISETUM GLAUCUM*) INJAIPUR DISTRICT, RAJASTHAN, INDIA" can be published in the International Journal of Environment and Climate Change.
