PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes</p> <p>Very okay</p> <p>It is comprehensive but too long (366 words). Reduce to 250 words</p> <p>The subsections require numbering except your journal want it so. The tables do not need S/N painted yellow by me, since the place of sampling is indicated/mentioned.</p> <p>Yes</p> <p>References are sufficient.</p> <p>All the GIS maps should be together, followed by all the tables with respect to their histogram. Remove the Fig 1: Lagos State annual precipitation graph. Take it to appendix. Let figure 2 become figure1. If you are using "fig". be consistent with it. Instead use "figure". Thirty six (36) pages is too much for an article publication. See how you can reduce the number of pages</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>reduce your grammatical error also. Unit should be separated from the number, figure from number etc. With a space. mg/L not mg/l.</p>	
<p>Optional/General comments</p>	<p>The research article is scientific, accept but publish after the minor correction. Name and address of the author is not on the manuscript.</p>
