

Review Form 1.7

Journal Name:	Asian Journal of Biochemistry, Genetics and Molecular Biology
Manuscript Number:	Ms_AJBGMB_102782
Title of the Manuscript:	A CASE CONTROL STUDY OF OXIDATIVE STRESS IN TYPE 2 DIABETES MELLITUS PATIENTS WITH HYPERTENSION ATTENDING JOS UNIVERSITY TEACHING HOSPITAL (JUTH), NIGERIA
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajbgmb.com/index.php/AJBGMB/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Not important and not adding any new scientific information. The methodology, content, assessment and reporting have flaws. The title needs review, the abstract needs review, the statistics to account for confounders and biases not documented. The language and flow with ease not there. The findings needs condensed and specific.</p> <p>Title not appropriate. Needs amendment to point to status of oxidative stress in those with diabetes and hypertension specifically in Nigeria</p> <p>Comprehensive but needs to be trimmed,succinct and specific with word limit from descriptive to informative abstract with subtitles. Manuscripts need to be condensed. Baseline characteristics need to be expanded followed by study specific tables and figures to illustrate the findings to support the objectives of the study. Its not scientifically correct. Needs further organisation of introduction to align with diabetes and oxidative stress. Statistical stress never accounted for confounders and discussions not having a good clear flow on. Needs extensive structural editing and some line editing as well</p> <p>Reference: Number of citations optimal. Type of referencing needs to be in accordance with the Journal requirement</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>English language is optimal in some paragraphs, but the connection and flow of language is not there. Its not coherent and needs review.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
