(<https://www.journalafsj.com/index.php/AFSJ/editorial-policy>)

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	none	
<b>Minor</b> REVISION comments	The manuscript is good for writing and the results are believable based on scientific knowledge. However, this work is fine for the publication Yet, some point needs to clarify by authors following:  1. Due to the sample of this study is flour form, why author has determined the group of phenolic compounds such as tannin, saponin etc. for the anti-nutritional factor? Generally, these kinds of bioactive compounds can interact with protein alright? how about the carbohydrate...it can interact in the structure?? The discussion point of this issue should be added more in the manuscript.	
<b>Optional/General</b> comments	none	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
