### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajcrs.com/index.php/AJCRS/editorial-policy> )

### PART 1: Review Comments

|   | Reviewer's comment   | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|--|---|
| <p><b>Compulsory</b> REVISION comments</p> <p><b>1. Is the manuscript important for scientific community?</b><br/>(Please write few sentences on this manuscript)</p> <p><b>2. Is the title of the article suitable?</b><br/>(If not please suggest an alternative title)</p> <p><b>3. Is the abstract of the article comprehensive?</b></p> <p><b>4. Are subsections and structure of the manuscript appropriate?</b></p> <p><b>5. Do you think the manuscript is scientifically correct?</b></p> <p><b>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></b></p> | <p>The manuscript is useful as mention tensor fascia late to cover the perineal region<br/>The abstract is comprehensive<br/>The part and the figure of burned arm are not related to the manuscript title and idea, so should only mention in patient examination without entry in more details as management and pictures of the arm (before and after Graft)<br/>all what mention about arm better to be removed except mention it in a history<br/>yes it scientific correct<br/>the reference are sufficient but it is lacking references in a last five years<br/>Lastly<br/>As regards the technique the flap was very bulky<br/>A hug dog ear need to be removed and to obtain better photo of patient<br/>And the figure lacing a picture of the patient during voiding urine stream to show the penile erection and function</p> |   |
| <p><b>Minor</b> REVISION comments</p> <p><b>1. Is language/English quality of the article suitable for scholarly communications?</b></p>  | <p>The English quality is acceptable but</p> <ol style="list-style-type: none"> <li>1. The title should be written better than this as each word must be capital letter</li> <li>2. The abstract has an abb which is PA nit declare before</li> <li>3. The (figure 7). Is written small</li> <li>4. (Figure 9) is written capital , so the writing must be similar all over the manuscript</li> </ol>  |   |
| <p><b>Optional/General</b> comments</p>   | <p>Good case, need more follow up and the flap need debulking<br/>Or even liposuction to match the abdominal skin.<br/>The arm burn are not related to the subject</p>   |   |

### PART 2:
