PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments) | <p>The idea of the study actually is interesting. However, the aim of the research has not clear yet. It could be more important if the author has a clear hypothesis of the study</p> <p>Yes, it is suitable</p> <p>No, it's lack of a brief introduction and the aim of the study</p> <p>Not yet. It's lack of discussion and Conclusion part</p> <p>It could be better of to add the microscopic data/figure of the fungi/mycoflora</p> <p>The references are very minimal, the author should include more references as well as the recent ones</p> | |
| Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications? | The author should check and revise the grammar. Maybe use grammar checking. Also check for the typo | |
| Optional/General comments | Please be consistent in writing the Latin names of the fungi/mycoflora. Such as use the abbreviation for the genus and full for the species if you had mention already | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-----------------------------------------------------|-----------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) | |
