

Editor's Comment:

The manuscript contain several changes and errors which I was made and marked in the ms.
Discussion

needs to be redrafted with regard to reference citation in the text. Partly I corrected, in some line it was mentioned reported or observed by then the reference number inside the bracket. it is incomplete for sentence. Please advice the author formulate the half of discussion which is highlighted in NLUE to follow the first half.

In reference also lots of mistakes found. Journal name should be uniform in citation and full name and not abbreviated and in italics.

So the paper is not accepted for publication in the present state. Needs revised one with all updated changes.
