

Editor's Comment:

Regarding the paper with narcotics and illegal drugs.

1. There are 2 more keywords needed, but simple terms which are not composed.
2. I suggest that the paragraph with the conclusion from Results and Discussions (In conclusion...) be inserted in the Conclusions part, because it refers to the quality of Rehabilitation which is decisive in completing the fight against Narcotics consumption and illegal drugs.

Also, a welcome statistical presentation, as far as possible, of the results of this particularly sensitive and long-lasting activity.

Ok for publishing.
