Review Form 1.7

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| <p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <p>1- The article is about the Indian farmers perceived & UTILISATION about a government program of agriculture. It is a good article but needs revising.</p> <p>2- Yes, it is.</p> <p>3- No. no structural. Nothing about methods, questionnaire, etc.</p> <p>4- No. Need revising.</p> <p>5- Yes. But it needs correction as I tell later.</p> <p>6- They are recent, but not sufficient.</p> <p>7-Nothing about data collection or probable questionnaire, its validity and reliability, the variable etc.</p> <p>8-In Mann- Whitney U test & Kruscal Wallis test, the data are non-normal or ordinal. The author told nothing about it.</p> <p>9-Resut and discussion should be two separate sections.</p> <p>10-Nothing about data collection, the variables, questionnaire, validity, reliability etc.</p> <p>11-In table 1 there are many unknown abbreviations.</p> <p>12-Since PD and ST in table 1 has zero frequency, its better to delete.</p> <p>13-I table 1 sum of percent for some variables are not 100.</p> <p>14-The description under table1 is the same as, the table so it is better to use either table OR description.</p> <p>15- How did the numbers of Figure 1 was calculated?</p> <p>16-The description under fig 1 is the repetition of the fig1.</p> <p>17-In Table 2 what are the limits of Low etc. perception.</p> <p>18-In X^2 test there should be condition on observed and expect frequencies. Did these conditions met in the calculation (table 2 & 3).</p> <p>19-Nothing about p-values in table 2 & 3.</p> | |
