Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> 1- Was a comparison made for this study with similar environments from Brazil, with an analysis of the prevalence rate of human papilloma virus (HPV) in oropharyngeal cancer between them? 2- Did the study take into consideration the physiological factors such as the gender of the students, male or female, and the economic situation? 3- Family history of infection with these viruses, in addition to previous infections with any virus? 4- A combined prevalence of 18% of human papillomaviruses in oropharyngeal cancer in Brazil. This percentage is low. What is your explanation for this case? 5- Alcoholic beverages , smoking and human papilloma virus infection (HPV) are among the important risk factors for oropharyngeal cancer. Was it conducted on students? 6- Discuss the following statement “In recent decades, the prevalence of human papillomavirus in these tumors has increased globally, especially in the more developed countries.” 7- The prevalence of human papillomavirus in oropharyngeal tumors in developing countries. Most studies show a decrease in human papillomavirus cases in oropharyngeal tumors. Explain this reason? 8- We used the R studio program to conduct the meta-analysis, which is a statistical program that is accepted worldwide by the scientific community in what differs from other statistical programs, SPSS or SAS. 9- General Prevalence of HPV in Oropharyngeal Cancer in the Brazilian Population HPV Prevention Programs and Educational Measures Need to Be Better Organized Are Poor
