<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>YES. The manuscript seeks to bring to the fore, the trend of antimicrobial resistance with a focus on lower respiratory tract infection, examining the activity of antibacterial agents to bacterial pathogens causing the infection.</p> <p>YES</p> <p>YES</p> <p>YES</p> <p>Not completely as it's deficient in the methodology for testing/interpretation of susceptibility to some drugs like vancomycin for staphylococci, macrolides to Gram negatives like <i>E. coli</i>, <i>K. pneumoniae</i> and <i>Pseudomonas aeruginosa</i>. This definitely falsely increased the incidence of MDR</p> <p>The references are sufficient/recent save for one or two which were stated in the reviewed manuscript. However, the references cited did not follow the journal guidelines. Both citation in text and the reference section. They need to be reviewed</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Its suitable	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
