

Editor's Comment:

I had reviewed the revised manuscript. Unfortunately I find too many errors in regular study. Please refer the questions of comment in attached file.

I doubt the two reviewers comments from the whole structure of manuscript and the methodology using reasonable. Honestly the quality of manuscript is not good from the basic academic paper writing.

I recommend to "reject" this manuscript. But the opinion is not equal to the two reviewers.

Maybe I should give up the final decision responsibility.
