PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1.somewhat 2.yes 3.can be expanded 4.lacking information and quite brief 5.It seems consistent but more justification is needed 6.recent yet they are in general to CRP need more specific to the title of the article</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	appropriate	
<p>Optional/General comments</p>	The author needs to add some more reference related to the CRP and pericarditis There is no mention of possible etiology of pericarditis and cause of death Unless the high CRP is properly correlated to pericarditis and no other coexisting pathologies like cancer etc how can the raised CRP be related to pericarditis only and leading to death where as a CRP of 40 doesn't deem that high as to be a cause of death.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
