

Editor's Comment:

The submitted paper,
entitled "Causes And Psycho-Social Effects Of Child Trafficking In
North Wollo Zone, Ethiopia",
is a very valuable paper that describes the reality of child trafficking.
I think it should be published.

The section numbering is incorrect and should be corrected before publication.

Ethical Consideration (section 4) should be numbered as section 3.10.

Result dissemination plan (section 5) should be deleted from the original paper.

RESULTS AND DISCUSSION should then be numbered as section 4.

The interview description in section 3.6 and the group discussion
description in section 3.7 duplicate the interview description at the
beginning of RESULTS AND DISCUSSION.

The latter should be deleted.
