

**Editor's Comment:**

Minor revision.

The authors have not made the corrections indicated by the two reviewers, the original manuscript and the revised one are practically the same. There are errors that have not been corrected, for example: Wistar must be written with the initial letter (W) in capital letter, the title has not been modified, the references have not been updated, the abstract remains ambiguous, the antioxidant activity is confused with anti-inflammatory activity and other considerations that have not been updated.
