

SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. The original manuscript and the revised one are practically the same. There are errors that have not been corrected, for example: Wistar must be written with the initial letter (W) in capital letter, the title has not been modified, the references have not been updated, the abstract remains ambiguous, the antioxidant activity is confused with anti-inflammatory activity and other considerations that have not been updated.</p>	<p>I don't agree with the comments of the reviewer regarding the title, the title should be maintain. also, the abstract is describing exactly what we did. Regarding the anti inflammatory activity, there are a lot of articles using lipid peroxydation as an anti-inflammatory test The references are not old, some are just 2 or 3 years back, the old references are for protocol in the methodology Please I agree that the work can be publish in this actual form</p> <p>Regards,</p>
