If you have suggestion of additional references, please mention in the review form.</b>  <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	Yes ,although the demographic data vary between the countries regarding the reinfection with SARS-COVID 19 disease.  Yes .the title is suitable but it needs correction from SRAScovid to SARS –COVID -19  It is not up to the mark , so there should be clarity of the aim of the study with some back ground information Need a comprehensive discussion , is it belong to which type of the study-prospective or retrospective Not fully scientifically correct , because there is no mention of the type of vaccine given to population in the study .nor its outcome  The authors need to give references from the Indian studies on COVID -19 from pubmed	
<b>Minor</b> REVISION comments  1. <b>Is language/English quality of the article suitable for scholarly communications?</b>		
<b>Optional/General</b> comments
