The manuscript appears to contribute to the ongoing research on automorphisms of various structures such as graphs and finite rings, particularly focusing on the zero divisor graphs of such classes of rings. It also highlights the connection between graph theory and algebraic structures, which could be of interest to researchers in both fields.</li> <li>2. The title seems to be a suitable title for the content you have mentioned. It accurately reflects the focus of the research on the automorphisms of zero divisor graphs in power four radical zero completely primary finite rings. It also conveys the specific nature of the study, which can be helpful for readers to identify the paper's contribution to the scientific community.</li> <li>3. The abstract provides a clear overview of the study and its objective.</li> <li>4. The subsections are appropriate and well-organized to effectively convey the research findings.</li> <li>5. It meets the scientific standards</li> <li>6. References are relevant, recent, and comprehensive.</li> </ol>
