Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Millets are still only consumed by traditional consumers and members of the economically underprivileged sections of society, despite having an exceptional nutritional profile. To achieve nutritional security and combat emerging climatic vagaries and life-threatening diseases, it is crucial to diversify food resources by including less common millets. Proteins are an excellent candidate for the development of a variety of functional and value-added food products due to their lack of gluten, bioactive compounds with medicinal value, and high micronutrient density.</p> <p>The importance of a manuscript for the scientific community depends on various factors, such as the significance of the research topic, the methodology used, the quality of the data and analysis and potential impact on the field. Unfortunately, all the above mentioned indicator are missing</p> <p>2. Acceptability of value added product from indigenous variety of Pearl millet grown in Rajasthan</p> <p>3. Do not full fill the criteria as mentioned in the guidelines</p> <p>4. Effort has been made but need attention w.r.t guidelines for authors</p> <p>5. Unfortunately Not, the material and methods section was not described. Sampling area was not described, sampling size is inappropriate, product development process is not mentioned, statistical analysis was not described, why male participant was not described. It seems to be a extension of another study but the reference was not provideded.</p> <p>6. Only few (03) reference was given and which are not in line with the format.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1. Acceptable</p>	
<p>Optional/General comments</p>	<p>1. Title is inappropriate</p> <p>2. Formatting errors are found in each sections</p> <p>3. The manuscripts seems are not in line with the scope of Journal</p> <p>4. Formatting errors</p>	

Review Form 1.7

	5. Hypothesis/ research problem is missing 6. Not well explained
