Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The paper "Impact of Fish Production on the Gross Domestic Product in Nigeria" is a very useful research that analyses and evaluates the impact of fish production on gross domestic product (GDP) in Nigeria, using data on time series between 1981 and 2021.</p> <p>The work is important for the scientific community, but also for practitioners because it helps to design the directions of action in research and practice in particular , and in addition to the two main variables of this study, which is fish production and GDP, some control variables (labour productivity and gross fixed capital formation) have also been used to control GDP.</p> <p>I note that the topic is of great importance because the research carried out has shown that many opportunities are offered for growth, development and improvement of business including the role of fish production on gross domestic product (GDP) in Nigeria, using data on time series between 1981 and 2021, from the study area.</p> <p>The title of the paper is appropriate to the research carried out because in the paper the aspects related to the impact of the role of the impact of fish production on the gross domestic product (GDP) in Nigeria are detailed, using data on time series between 1981 and 2021.</p> <p>The summary of the paper presents the important elements of the research carried out, which mainly concern the factors influencing the impact of fish production on gross domestic product (GDP) in Nigeria, using data on time series between 1981 and 2021.</p> <p>We appreciate the capacity analysis to identify and design a management strategy for the effective use of the role of fish production on gross domestic product (GDP) in Nigeria.</p> <p>The overall objective of the research focused on an in-depth analysis of the importance of how to know the impact of fish production on gross domestic product (GDP) in Nigeria, using data on time series from 1981 to 2021.</p> <p>The research reveals the importance of analysis on the factors that influence the impact of fish production on gross domestic product (GDP) in Nigeria through the use of modern systems, skills, innovative capabilities and management.</p> <p>The structure of the work and its subsections are in a sequential sequence and lead to the presentation of the results of the research.</p> <p>I appreciate that the research is based on risk behaviour with impact analysis: factors influencing the impact of fish production on gross domestic product (GDP) in Nigeria, using data on time series between 1981 and 2021, and which require a scientifically and practically appropriate approach.</p> <p>The study was also based on a series of own analyses that are based on the specialized literature, and during the scientific approach, the opinions of analysts, researchers, experts and professionals in the field were called upon and important approaches from the literature specific to the field, references and corresponding bibliographic sources were indicated.</p> <p>The research was based on appropriate methods of data collection and analysis.</p> <p>Therefore, the research carried out is important because it reveals that it contributes significantly to the field of knowledge through the impact of fish production on gross domestic product (GDP) in Nigeria, using data on time series between 1981 and 2021.</p> <p>We believe that it is important to have a risk behaviour, but also to carry out the analysis of the impact of control and balance on the relationship between financing constraints and investment efficiency, especially in the area of study that must be properly analysed and which can contribute to the favourable evolution of transactions, especially to ensure the development of businesses and other industries.</p> <p>The results showed that the research undertaken benefits policymakers by providing comprehensive information about fish production and gross fixed capital formation that have a positive and significant impact on economic growth in Nigeria, while labour productivity has a negative impact on economic growth in Nigeria. This means that labour productivity does not contribute to economic growth in Nigeria.</p> <p>The proposed recommendation is that taking into account the results of the study that provide valuable information for decision-makers to take measures to encourage fish production in order to bring about a greater influx of funds that will help trigger economic growth. This could be achieved</p>	

Review Form 1.7

	<p>by reducing contamination of the seas and oceans for better production of aquatic products in Nigeria.</p> <p>The analysis of the information obtained from different sources during the study shows that a number of solutions were identified that allowed the conclusions to be substantiated.</p> <p>The conclusions drawn from the research carried out in order to use all the available opportunities were summarised.</p> <p>At the same time, through the present research, it is contributed, both theoretically and practically, to the identification and design of solutions to discover the predominant problems, necessary for the decision-makers to support and intensify policies and solutions that help the political and economic decision-makers.</p> <p>These factors should focus on promoting more research on identifying risks that can generate risk-taking behaviour, and that mitigate risk aversion that leads to the use of the information obtained to better understand users' behaviours, needs and preferences.</p>	
Minor REVISION comments		
1. Is language/English quality of the article suitable for scholarly communications?		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
