

**Editor's Comment:**

Thank you for sending the paper to me. The author has made certain revisions and addressed the recommendations made by respected reviewers. However, I would support the reviewers' opinion that the discussion component remains weak. This is a particular weakness of this paper which claims to be a review article. For a review article, a far more comprehensive review of the literature is needed (and a more substantial list of references). The author should improve the orientation of the paper on a critical discussion of current gaps in the literature and policies.
