<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes	
<p>Optional/General comments</p>	<p>The manuscript presents an interesting rare case, however to improve the quality of the manuscript, there are some suggestions for the authors:</p> <ol style="list-style-type: none"> 1. According to the statement, Trichobezoars present both a diagnostic and therapeutic challenge. The authors should explain what the challenge is, whereas in this case the diagnostic was made by CT Scan pre operatively without difficulty. The therapy is also common by performing gastrotomy and take the bezoar out without difficulty. 2. The authors should explain the purpose of publishing the manuscript, the case of trichobezoar has already been reported in so many journals. 3. The statement on the title is Gastric trichobezoar manifested with chronic epigastric pain. The author should explain what is special with this title, because abdominal pain is very common in cases of trichobezoar (88%) [Int J Surg Case Rep. 2022 Feb; 91: 106782. Published online 2022 Jan 22. doi: 10.1016/j.ijscr.2022.106782]
