

Editor's Comment:

The manuscript is not arranged as to be a paper for publication for the following reasons:

1-The structure of this work can be considered as a part of a report not as an article or a review.

2- If the author intends to make a review (as mentioned in the methodology section), I think more and more references old and up to date references have to be cited and reviewed.

3- Some of the comments of reviewers are not considered, such as (Add some comparison results and discussion

Give a comparison from previous work)

4- The references are not formatted according to standard documentation.

5- The structure is not suitable at all.

Based on that, I recommend rejecting this work and cannot be considered for publication in this form.
