

## Review Form 1.7

Journal Name:	Asian Journal of Research in Biochemistry
Manuscript Number:	Ms_AJRB_96421
Title of the Manuscript:	Hepatocurative Effect of Some Ethnomedicinal Plants on Liver Function Indices in Alloxan-Induced Diabetic Rats
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journalajrb.com/index.php/AJRB/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments 1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript) 2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title) 3. <b>Is the abstract of the article comprehensive?</b> 4. <b>Are subsections and structure of the manuscript appropriate?</b> 5. <b>Do you think the manuscript is scientifically correct?</b> 6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b> <b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b>	The current study was focuses on curative effects of <i>Moringa oleifera</i> (MO), <i>Treculia africana</i> (T.A.), and <i>Albizzia chevalieri</i> (A.C.) plant extracts on the liver function indices in Alloxan-induced diabetic rats, the findings of this study are clear and good contribution in the field. The work presented is original and should be of interest for the readers of the AJRB. The Protein analysis conclusion part should be revisited and the hypotheses which drove the authors to study genes should be more thoroughly discussed. Give citations in chronological order. Reference citations of 2021 and 2023 are needed. Also, it would be interesting to include any available data for possible mechanism for hepatocurative effect and other physical parameters being discussed in whole manuscript. Finally, I strongly suggest the authors contract a proofreading and editing service before publication as many words are repeated again and again and grammar and syntax errors are very common. In Figure 1 and 2 legends, font size is different. All manuscript needs to be coherent. <b>For these reasons, I recommend the acceptance of this article with minor revisions</b> , so that it should be straightforward.	
<b>Minor</b> REVISION comments 1. <b>Is language/English quality of the article suitable for scholarly communications?</b>	I strongly suggest the authors contract a proofreading and editing service before publication as many words are repeated again and again and grammar and syntax errors are very common	
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
