

## Review Form 1.7

Journal Name:	Asian Journal of Research in Botany
Manuscript Number:	Ms_AJRIB_96836
Title of the Manuscript:	EVALUATION OF PLANT FUNGICIDES IN THE CONTROL OF FUNGII AFFECTING THE GROWTH AND COB YIELD OF MAIZE IN AWKA.
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journalajrib.com/index.php/AJRIB/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments  <b>1. Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)  <b>2. Is the title of the article suitable?</b> (If not please suggest an alternative title)  <b>3. Is the abstract of the article comprehensive?</b>  <b>4. Are subsections and structure of the manuscript appropriate?</b>  <b>5. Do you think the manuscript is scientifically correct?</b>  <b>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b> <b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b>	Dear Author,  I appreciate your having done this experiment. Much of my desire to help you, as a crop protection specialist, I suggest you limit your work on the effect of the two plant extracts to growth and yield performance of maize. Your objective did not match the methodology and the data you collected. So I highly suggest to simplify your work as you can not account the fungicidal effect of the said plants although there were studies done but in your case the data is limited. To save your data, your Title shall be:  EFFECT OF PLANT EXTRACTS ( <i>A. indica</i> and <i>C. Citratus</i> ) ON THE PERFORMANCE OF MAIZE  Therefore, in your manuscript just do away with fungicides reviews. You can recommend though for future studies to study the fungicidal effect of the two extracts.  Then if one studies a particular disease, then the variety of corn should be susceptible to that particular disease and the pathogen must be inoculated to the corn plants to make sure of the disease infestation to justify the study of botanical fungicide.  One thing: I was wondering you have Table 3 which talk about Aflatoxin. Why?	
<b>Minor</b> REVISION comments <b>1. Is language/English quality of the article suitable for scholarly communications?</b>		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	(If yes, Kindly please write down the ethical issues here in details)
