However, I have the following comments:</p> <ol style="list-style-type: none"> <li>The authors should give conditions for HPV to clear out on its own as opined by them under discussion after figure 2 and 3, because virus don't die normally.</li> <li>The specific figure(s) being discussed should be mentioned.</li> <li>The word " chapter" should be replaced with "section" so as to have section one.</li> <li>The authors(s) should include the fact that early diagnosis can lead to decline of infected class if there is treatment, management and recovery. Actions/ steps to be taken to achieve these should be sufficiently discussed.</li> <li>Section 7 should be Conclusion and not discussion since there were discussions under the numerical simulation.</li> </ol>
