

Editor's Comment:

I have read this manuscript. I think this paper need some revisions because some points advised by referees were not corrected. Some suggestions are below.

1. it should follow the author guidelines format.
2. In ABSTRACT, "Whereas the leafhopper and thrips population had significant positive correlation with ($r= 0.59$ and $r= 0.61$), respectively at minimum temperature in Kharif 2021."
- Nigude et al. 2018a, delete "a"; Gocher et al. 2019a, delete "a".
3. If possible, please authors add 1-2 figures and the map of the studied area.
4. Please authors polish English writing.
