

Editor's Comment:

After examining the peer review report, the author has carried out the critical corrections in the paper. Comments by reviewer and this can be considered.

The title is clear, I suggest it be modified as follows: Effect of Planting Patterns and Mulch Types on weed Growth and Yield of Sweet Corn and Red bean.

The title can be changed and given as above one which is meaningful for the paper. Rest the paper can be accepted with a change in title.
